Part C: Cloze Test

<u>Directions</u>: Read the following passage and choose the word or phrase (1), (2), (3) or (4) that best fits each gap. Then mark the answer on your answer sheet

We had now reached the summit of the loftiest crag. For some minutes the old man seemed too much exhausted to speak.

The "little cliff," upon whose edge he had so carelessly thrown himself down to rest (37) ....., while he was only kept from falling by the (38) ..... of his elbow on its extreme and slippery edge—this "little cliff" arose, a sheer unobstructed precipice of black shining rock, some fifteen or sixteen hundred feet from the world of crags beneath us. Nothing would have tempted me to within half a dozen yards of its brink. In truth (39) ....., that I fell at full length upon the ground, clung to the shrubs around me, and dared not even glance upward at the sky—while I struggled in (40) ..... to divest myself of the idea that the very foundations of the mountain were in danger from the fury of the winds. It was long before I could reason myself into sufficient courage to sit up and look out into the distance.

#### Part D: Reading Comprehension

<u>Directions</u>: Read the following three passages and choose the number of the answer choice (1), (2), (3) or (4) that best answers each question. Then mark the answer on your answer sheet.

#### Passage 1:

If you find yourself stuttering your way through tourist French, spare a thought for the first modern humans. Travelling from Africa to Asia and Europe about 70,000 years ago, they would have encountered their evolutionary cousins, the Neanderthals, for the first time.

What did they say? In the past, many would have answered "not a lot" since Neanderthals weren't thought to have complex speech. But recent evidence suggests they probably had languages very similar to our own. Surprisingly, we may now have the means to glimpse those utterances in the words we speak today, with huge consequences for our understanding of language evolution.

The argument that Neanderthals spoke like us comes from many discoveries. Archaeological remains show that they had a sophisticated lifestyle, with human traits like caring for the infirm and the sick, and an advanced toolkit, including bone tools and body paint—complex behavior that should only be possible if they had language. We also have some more direct anatomical evidence: traces of nerve pathways through bones in the skull suggest Neanderthals could control their vocalizations, for instance—an adaptation necessary for language that other apes lack. It also looks as if Neanderthals had many gene variants associated with processing language.

So it seems reasonable to assume that their speech would have been similar to our own, with the differences either being down to their vocal anatomy, the way their brains were wired, or simply cultural evolution around the time they diverged from modern humans. The question is, can we guess what it sounded like?

Unlikely as it may seem, there is a way. Here's the rationale: when two groups that speak different languages come into contact, they exchange bits and pieces of language, like words or grammatical rules. Linguists can detect traces of such interactions even after thousands of years have passed. We know that once modern humans left Africa, they lived alongside Neanderthals and sometimes bred with them. They may have shared cultures, and there is evidence that Neanderthals gave our ancestors the idea for certain tools—so it seems likely they conversed too. The task, then, is to find out whether languages differ between the populations, mostly in Africa, that never came in contact with Neanderthals, and <u>those</u> that would have met them.

#### 41- What is the passage mainly concerned with?

- The variables that made it possible for the descendants of primitive people in Africa to plant the seeds of the greatest migrations in human history
- Whether Neanderthals spoke a language and whether the properties of their speech can possibly be determined
- The contribution made by early humans to the development of our present-day linguistic repertoire
- What prompted the Neanderthals to traverse a long distance to reach other continents

	1) accentuate the many uncertainties surrounding the possible origin of speech
	2) provide information rather than pose a question that demands an answer
	3) pave the way for what is presented in the paragraph that follows

Passage 2:

A revolution in education has been promised with a little help from technology. Massive Open Online Courses (MOOCs) are free, online university-level instruction that anyone can access from anywhere, at least in theory. They have dominated headlines in the sector in recent years.

Proponents have made bold claims for a fundamental change in higher education—drastically decreasing price and increasing access. Thomas Friedman, in an article in *The New York Times*, argued that nothing has greater potential to "lift more

people out of poverty" and to "unlock a billion more brains to solve the world's biggest problems. Anant Agarwal, founder of MOOC provider edX, believes they are making education "borderless, gender-blind, race-blind, class-blind, and bank account-blind."

However, skeptics counter that they may make colleges more exclusive and exacerbate educational inequalities: affluent students will use the online courses to augment teaching on campus, while the less fortunate will be stuck with automated online instruction with little personal guidance. Others worry about the quality of course content, the ability of students to learn outside the classroom, and the creation of a few "super-professors" who reach millions of students while others reach <u>none</u>.

Until now, the debate has been a fact-free zone. Both sides strongly assert their claims but have had little data to draw on. Not anymore. The University of Pennsylvania conducted a survey of more than 400,000 active students in courses offered by the university through Coursera—the biggest MOOC provider—and received nearly 35,000 responses. The results provide much needed information on who is participating and why.

At least in their early stages, these courses are not providing the revolution in access that proponents claim. Two-thirds of participants come from the developed world—the US and other members of the OECD, the club of leading industrialized countries. This is despite the fact that these 34 countries only account for 18 per cent of the world population. And 83 per cent of MOOC students already have a two or four-year diploma or degree, even in regions of the world where less than 10 per cent of the adult population has a degree. Meanwhile, 69 per cent of them are employed.

Furthermore, 56 per cent are male, rising to 68 per cent in the BRICS nations of Brazil, Russia, India, China and South Africa, and 62 per cent in other developing countries. Even more alarming, the gap between male and female participation is far greater for these courses than in traditional education. The 36 per cent gap between male and female uptake in BRICS countries is nearly three times as large as in traditional higher education there. The US is one exception, where males and females participate in equal numbers in both.

48- What is the primary purpose of the passage?

1) Analyze an argument

- 2) Critique an approach
- 3) Reconcile opposing viewpoints 4) Suggest a solution to a dilemma

#### 49- Which of the following about MOOC is NOT true, according to the passage?

- There are people who argue that the plan has somehow failed to live up to the bold claims of its initiators.
- There are some who claim that it can help ameliorate the lifestyle of the deprived section of society.
- The facts recently accumulated seem to vitiate the position of the champions of the program.
- The idea of it first emerged in an article published in a magazine with a large readership.

#### 50- The word "none" in paragraph 3 refers to ......

- 51- According to the passage, Massive Open Online Courses were primarily intended to ......
  - 1) initiate free, online university courses that could create equality of access to higher education
  - 2) enhance the quality of a deteriorating tertiary level education by capitalizing on technology
  - address educational problems which orthodox teaching methods had already attempted to overcome, but to no avail
  - 4) extend the province of higher education to include those deprived people who are unable to extricate themselves from the shackles of traditional classes
- 52- It can be understood from the passage that the proponents of MOOC

## 1) are not informed by recent technological developments

- look on the program from totally divergent perspectives
- make comments that are not based on hard facts and figures
- 4) attach scant importance to the ability of students to learn outside the classroom
- 53-The passage supplies information that would answer which of the following questions?
  - 1) What is the primary motive of the people who have participated in MOOC?
  - 2) Why is it that the majority of MOOC participants come from the so-called developed countries?
  - 3) Why did some of the people which the University of Pennsylvania survey not return their questionnaires?
  - 4) What is special about the proportion of the male US participants of MOOC to their female counterparts?

#### Passage 3:

Twenty thousand years ago, the average human brain was 10 per cent larger than it is today. Some people, such as David Geary, an eminent psychologist, claim that the dip in cranial capacity marks our dwindling intelligence. Others, like John Hawks, an anthropologist, attribute it to improved brain efficiency.

But for Bruce Hood, the author of The Domesticated Brain and a psychologist at the University of Bristol, UK, the shrinkage is best explained by changes in society. "We have been self-domesticating through the invention of culture and practices that ensure that we can live together," he writes. Our brains, he believes, are getting downsized by domesticity.

Domestication tends to have that effect. According to Hood, every species that has been domesticated by humans has lost brain capacity as a result. Bred for passivity, their testosterone decreases, reducing the size of all organs. Dogs are a good example and the effect on their behavior is telling: where wolves will try to solve a problem through cunning, dogs are adept at soliciting help from their masters.

Drawing on his research in developmental psychology, Hood often enlists parallels between dogs and children to support the notion of human domestication. Like dogs, kids are highly skilled at enlisting assistance. Even infants have the knack, getting parents to fetch an out-of-reach object with a glance. Also like dogs, they are great readers of social cues: only dogs and humans know to follow a pointed finger to an object.

---------	-------	-------------------------------------

Of course, human culture is more sophisticated than the domestication of dogs, and Hood is highly attentive to differences between humans and other creatures. Imitation is one interesting area of distinction. Chimps and pre-school children both mimic the actions of others in order to learn a new skill. But a chimp will imitate only the motions necessary to achieve the goal, whereas a child also mimics steps clearly unrelated to the task. "Why would children over-imitate a pointless action?" asks Hood. Because they are more interested in fitting in than in learning how best to solve the task, he says.

Hood argues that our social adeptness is both a cause and an effect of our self domestication, and suggests that our social behavior is key to our species' success. Knowledge can be broadly distributed, disparate areas of expertise collaboratively coordinated, and technology can develop over many generations.

Hood also acknowledges that our socially domesticated brains are responsible for prejudice, and can condone horrific acts, such as genocide. The importance we place on allegiances, for example, is all too easily manipulated by unscrupulous people, and deplorable actions are too readily committed through what Hood calls'' diffusion of accountability''.

Understanding the good or bad consequences of domestication is invaluable to us because the self-reflexiveness that made us who we are can also, potentially, improve us in the future. For that important reason, Hood is to be commended for writing *The Domesticated Brain* at a level that anyone can understand.

That said, in his effort to encompass all of psychology in just 300 pages—evidently the <u>remit</u> of a Pelican Introduction title—he often loses touch with his theme. The result is informative but, sadly, largely formless.

- 54- The passage refers to dogs' seeking help from their masters primarily to
  - argue that smart animals are more prone to brain downsizing than less smart ones
  - 2) bolster the Domesticity Hypothesis propounded by Bruce Hood
  - 3) manifest the effect of brain shrinkage on observable behavior

4) state that brain downsizing is not confined to humans

- 55- The author mentions chimps and pre-school children in paragraph 5
  - to supply further evidence to buttress an already stated reason to account for human brain shrinkage
  - 2) to argue that dogs are not the only species that bear resemblances with humans
  - 3) to stress the fact that imitation in humans is acquired rather than innate
  - 4) to indicate that Hood's hypothesis should not be overgeneralized
- 56- Hood posits that human tendency to fit in with human society .......
  - can help avert atrocities by nurturing a more cultured behavior in human beings
  - manifests its increasing prevalence as horrific acts, such as genocide, continue to expand
  - is a human trait that can be manipulated by some ruthless people to the detriment of mankind
  - may usher in a concatenation of disastrous events in our social life, whose prevention lies in highlighting the importance of allegiances

## LITERARTY TERMS AND CRITICISM

- 121- 'Fabian society', a society founded in 1884 by a group of English intellectuals,
  - had among its leading theorists and practitioners the critic Walter Pater and the poet Ernest Dowson
  - originated in the poetry of such mid-19<sup>th</sup> c. Symbolist French poets as Charles Baudelaire and Stéphane Mallarmé
  - rejected the idea of a socialist revolution but supported the gradual transformation of English government
  - 4) advocated a modified form of the early 19th century policy of laissez-faire
- 122- The contemporary school of American poets 'language poets'......
  - emphasizes a number of defamiliarization techniques, including the condensation and distortion of words, phrases, and sentences
  - aims to produce 'absolute forgetfulness' of language that conforms with the existing codes pervading contemporary culture
  - is best represented in the poetry of William Carlos Williams and particularly Wallace Stevens
  - values poetry's artistic purpose at the expense of its social and political functions
- 123- Which of the following about the stock character in classical drama 'the eiron' is NOT true?
  - The eiron is a basic figure in comedy, often portrayed as the good friend of the hero.
  - His pose as a self-deprecating, humble figure enables him to outwit his opponents, particularly the alazon or boaster in the play.
  - 3) The real life prototype of the eiron was the philosopher Socrates, who always professed his own ignorance while exposing the faulty thinking of others.
  - 4) As friends with and confidant to a number of important characters in the play, he often has them reveal their inner feelings to the audience.

# 124- All the following about the term 'vaudeville' are true EXCEPT that

- 1) it was the American equivalent of the British music hall
- it enjoyed great popularity as a form of entertainment in the late 19<sup>th</sup> and early 20<sup>th</sup> c
- it saw the height of its popularity near the end of the 18<sup>th</sup> c. with the plays starring Edward Garrick
- it might include as performance jugglers, acrobats, magicians, dramatic soliloquies, and slapstick comedy
- 125- A(n) ..... is a pictorial and poetic device containing a motto, an engraving that symbolically depicts the motto, and a short verse that comments on the motto and the engraving.
  - 1) 'emblem' 2) 'débat'
  - 3) 'trouvères'
     4) 'recension'
- 126- The term 'well-made play' refers to a play ......
  - in which the audience sits in front of a stage 'framed like a picture' that is revealed by the opening of the curtain
  - that is skillfully constructed to please the audience, but lacks the substance and complexity of serious drama
  - that exemplifies a dramatic conflict which is finally shown to be part of a larger—and often unresolvable— social or moral paradox
  - which generally represents the world as a vast theatre in which human history can be played out

#### 127- The poem termed 'complaint' was ......

- 1) a long lament on the cruelty of fate on the fortune of the aspiring poet
- 2) an 18th c. type of 'socio-political' poem written by a poet to the sovereign
- 3) appended to various petitions demanding justice in a particular case
- a kind of monologue which became highly conventional in love poetry
- 128- 'City comedy' or 'citizen comedy' is a kind of comic drama produced in the London theatres of the ....., characterized by its contemporary urban subject-matter and its, ....., portrayal of ..... life and manners

# 1.30- Which of the following about the Roman critic Horace (65-8 B.C.E.) / his An Poetica is NOT true?

- He developed the concept of decorum in his Ars Poetica, according to which the poet had to fit the part to the whole, the subject to the appropriate genre, and meter and language to both character and circumstance.
- His Ars Poetica is less a formal verse epistle than a long conversational poem about poetry.
- 3) He managed to break away with the Aristotlean tradition of criticism and theory (as represented in *Poetics* and *Rhetoric*) in *Ars Poetica* and thus create new ground for an indigenous 'Roman' kind of criticism.
- 4) He is celebrated for his criticism as well as his poetry: he produced numerous lyric poems, odes, satires, and verse epistles (letters).

# 131- To the French critic Hippolyte Taine (1828-1893) ......

- 1) the text is 'a living being', never an 'object' to be 'dissected' for the discovery of its meaning
- a text is similar to a fossil shell that naturally contains the likeness of its inhabiter, the author
- 3) a complete analysis of the text is possible without considering its author or his or her inner psyche
- accurate understanding of a literary text depends on an investigation into the life and works of its author's peers

# 132- All the following statements about the cotemporary French literary theorist Julia Kristeva (b. 1941) / her work is true EXCEPT that she ........

- 1) develops the concept of the 'ideologeme' based on Bahktin and Medvedev's The Formal Method in Literary Scholarship
- provides a complex account, based in psychoanalytic theory, of the relationship between the 'normal' and the 'poetic' (in her *The Revolution in Poetic Langage*)
- offers at once a radical critique of psychoanalysis drawing on, but going beyond, Lacan – and a close textual method for the reading of texts which she terms 'schizoanalysis'
- draws on the work of Mikhail Bakhtin and the Russian Formalists to propose the idea of 'intertextuality', later associated with developments in poststructuralism

# 133- The French literary theorist Roland Barthes (1915-1980) posits the idea that

- 1) 'the text of bliss' 'unsettles the reader's historical, cultural, psychological assumptions . . . brings a crisis to his relation with language'
- a realistic novel offers an 'open' text with unlimited meaning—like any other text that encourages the reader to *produce* meanings
- when we read as critics, we always step outside discourse and adopt a position invulnerable to a subsequent interrogative reading
- readers are free to open and close the text's signifying process only through veneration of the signified

- 138- Which of the following statements about the English critic Raymond Williams / his thought and work (1921-1988) is TRUE?
  - He related the 'whole process of individuation' to structures of power and influence as well as to the poststructuralist notion of binary oppositions.
  - He began his critical writing with a reaffirmation of the main English tradition of critical cultural thought which regarded 'culture' as 'a whole way of life'.
  - He rejected the characterization of his theoretical work as 'Marxist' and developed his own critique of Marx in his (*Marxism and Literature*, 1977).
  - His general project the study of all forms of signification in their actual conditions of production – was always emphatically historical and materialist.
- 139- In his Postmodernism, or the Cultural Logic of Late Capitalism (1991), the American Marxist theorist Fredric Jameson ......
  - 1) reads the odd materialist mysticism of Walter Benjamin 'against the grain' to produce a revolutionary and innovative Marxist criticism of capitalism
  - looks in particular to the strategy he terms 'cognitive mapping' (as applied to the Bonaventure Hotel in Los Angeles) for the necessary understanding, critique and transcendence of the world capitalist system
  - reviews the culture of 'the aesthetic' in post-Enlightenment Europe dialectically—seen as a binding agent in the formation of 'normal' capitalist subjectivity
  - maintains that, as a totalizing system, postmodernism is merely a style, with no particular relevance to the 'cultural dominant' of our time, which is 'high capitalism'
- 140- The French poststructuralist critic Michel Foucault (1926-1984) ......
  - regards discourse as a central human activity, but not as a universal 'general text', a vast sea of signification
  - is interested in the historical dimension of discursive constants what it is possible to say will stay effectively the same from one era to another
  - argues that the set of structural rules which informs the various fields of knowledge is within individual consciousness
  - posits that individuals working within particular discursive practices think or speak without necessarily obeying the unspoken 'archive' of rules and constraints

# 143- Which of the following descriptions is related to the Renaissance figure John Skelton (1460-1529)?

- In his satires, he rejects the ornate rhetorical devices and aureate language that characterized his period's most ambitious poetry; he writes in short, rhymed lines, having from two to five beats, and the lines can keep on rhyming helterskelter until the resources of the language give out.
- 2) His book (entitled in full) Acts and Monuments of these latter and perilous days, touching matters of the church, wherein are comprehended and described the great persecution and horrible troubles that have been wrought and practiced by the Romish prelates from the year of Our Lord a thousand to the time now present was in Latin in its first version and dealt with the persecutions suffered by the early reformers.
- 3) Many of his works, including his satires and his psalm translations, express an intense longing for "steadfastness" and an escape from the corruption, anxiety, and duplicity of the court. The praise, in his verse epistle to John Poins, of a quiet retired life in the country and the harsh condemnation of courtly hypocrisy derive from his own experience.'
- 4) His main concern in his major works is law in general and the several kinds of law; the nature, authority, and adequacy of Scripture; the rites, ceremonies, worship, and government of the English church; and various embodiments of authority, legitimate and illegitimate—elders, bishops, kings, and popes.
- 144- One of the great and influential books of the Renaissance, *II Cortegiano (The Courtier)* (1530-1566), translated by the humanist and diplomat Sir Thomas Hoby and published in 1561, describes ...... in the years 1504-08 the qualities of the ideal courtier.
  - through long passages of exquisite expository precision from the mouth of an imaginary man-of-the-world Duke Costello (written)
  - by means of dialogues between actual men and women living at the court of the duke of Urbino
  - through a blend of flowery prose and long verse epistles exposing the inner thoughts of some early Renaissance courtiers
  - in a lengthy correspondence between two 'courtiers-about-town', Count Zepirelli and Count Escada
- 145- Which of the following statements is NOT related to a description of the late sixteenth century figure Michael Drayton (1563-1631)?
  - His self-styled masterpiece is *Poly-Olbion*, a thirty-thousand-line historicalgeographical poem celebrating all the counties of England and Wales.
  - 2) He wrote tragedies, court masques, a historical epic called *The Civil Wars* Between the Two Houses of Lancaster and York, a prose History of England, several fine verse epistles, one of the best Elizabethan sonnet sequences, Delia, and a verse dialogue on the purpose of writing poetry, Musophilus.
  - He made a significant contribution as well to the period's vogue for sonnets, publishing a sequence called *Idea's Mirror* (1594) that, following substantial revision, he republished as *Idea*.
  - He collaborated on plays, wrote scriptural paraphrases, pastorals, odes, poetic epistles, verse legends, and a historical epic called *The Barons' Wars*.

- 158- Which of the following about the South African writer Nadine Gordimer (1923-2014) is NOT true?
  - She has drawn criticism both for her apparent lack of attention to feminism in favour of race issues and for the wholeness and unfashionable completeness of her novels—their plottedness, meticulous scene paintings, fully realised characters.
  - She wrote "Telephone Conversation," a mini verse drama of sorts in which two characters, a racist English landlady and an African trying to rent an apartment, are wittily pitted against one another.
  - In her non-fiction, she self-consciously places her writing within a tradition of European realism, most notably that defined by the Hungarian philosopher and critic Georg Lukacs (1885-1971).
  - Her The House Gun (1998) and The Pickup (2001) show an uncompromising focus on the inhabitants of a racially fractured culture.
- - 1) individual statements, such as Hulme's lecture 'Romanticism and Classicism'

#### LITERARY GENRES

- 161- A well-known poem by John Donne's (1572-1631) opens with the lines
  - 'When by thy scorn, O murderess, I am dead, / And that thou thinkst thee free / From all solicitation from me, / Then shall my ghost come to thy bed, / And thee, feigned vestal, in worse arms shall see.'
  - Adieu, farewell, earth's bliss, / This world uncertain is; / Fond are life's lustful joys, / Death proves them all but toys, / None from his darts can fly; / I am sick, I must die. / Lord, have mercy on us!'
  - 3) 'There is a garden in her face, / Where roses and white lilies grow; / A heav'nly paradise is that place, / Wherein all pleasant fruits do flow. / There cherries grow, which none may buy / Till 'Cherry ripe!' themselves do cry.'
  - 4) 'Now winter nights enlarge / The number of their hours, / And clouds their storms discharge / Upon the airy towers. / Let now the chimneys blaze / And cups o'erflow with wine, / Let well-tuned words amaze / With harmony divine.'

# 162- Which of the following statements about John Milton's Il Penseroso (1645) is NOT true?

- It had a considerable influence on the meditative graveyard poems of the 18th cent., and there are echoes in Pope's 'Eloisa to Abelard', and later Gothic works.
- It is an invocation to the goddess Melancholy, bidding her bring Peace, Quiet, Leisure, and Contemplation.
- 3) It challenges the goddess Mirth to a verbal duel on its utter futility amid the 'deceitful delights' of 'towered cities' and the 'busy hum of men'.
- It describes the pleasures of the studious, meditative life, of tragedy, epic poetry, and music.

1) Oliver Goldsmith	2) William Collins
3) James Thomson	4) Thomas Gray

- 164- John Keats's Endymion: A Poetic Romance (1818) ......
  - is a poem of about 800 lines based on the classical myth of a mortal detested by the goddess of the moon
  - offers at its conclusion a way of resolving the opposition in the poem between the inevitably mortal pleasures of this world and the possibility of delights that would be eternal
  - deals partly with Endymion's vision of his love for a Chinese Queen offered to him by Bacchus, god of wine and revelry
  - tells of Endymion's long but pleasurable search for a mortal goddess, an earthly figure, whom he had seen in his childhood visions

## 225- Which one of the following choices is correct about the two sentences below? Mary loves poetry. She was born in Shiraz.

- The sentences are both coherent and cohesive, because they refer to the same person Mary.
- The sentences are coherent, because we know that there is an association between being from Shiraz and loving poetry.
- The sentences are cohesive, because we know that there is an association between being from Shiraz and loving poetry.
- The sentences are coherent, because the pronoun <u>she</u> in the second sentence refers to the noun phrase Mary in the first one.
